

TUSCAN GLAZE

BRING THE BEAUTY
OF TUSCANY
TO YOUR BUILDING

dryvit[®] 
An RPM Company

BRING THE BEAUTY OF THE TUSCANY REGION OF ITALY TO YOUR HOME OR BUSINESS

Italy's famous Tuscany region earned its fame for more than just great wines, breathtaking rolling hills and being the birthplace of some of the world's most accomplished renaissance painters. It is also famous for its beautifully rustic architecture, which served as the inspiration for Dryvit's remarkable Tuscan Glaze.

The exterior of buildings once roamed by the likes of da Vinci, Michelangelo and Alighieri can be recreated by using Dryvit's Tuscan Glaze. Buildings of all types can be colored and textured to meet specific designs or simple artistic flair. Tuscan Glaze is a tintable acrylic stain that can be applied to acrylic or elastomeric finishes, providing a dazzling "Old World" or "antique" look to the building exterior.

Because Tuscan Glaze can be applied over a broad spectrum of Dryvit finishes, it provides the designer with great flexibility in achieving the preferred look. Skilled applicators can create the level of mottling desired.

PERFECT FOR RESIDENTIAL AND COMMERCIAL APPLICATIONS

Tuscan Glaze can be applied on both residential and commercial buildings to create truly unique exteriors. The stain offers the rich luster of Old World finishes in almost any setting where a unique and distinctive exterior is desired.

While Tuscan Glaze is often used in residential applications, it has also been successfully used on commercial projects, especially in the retail, hospitality and entertainment industries in which uniqueness and specific architectural appearance are highly valued.

DESIGN WITH FREEDOM

You can achieve optimal design flexibility with textures to create almost any look desired.

When you add in a dazzling array of finish options, the design opportunities are virtually endless. Because Tuscan Glaze is a stain applied over traditional Dryvit finishes, your Dryvit listed applicator can control the application to achieve the precise look you desire—heavily mottled or more evenly colored; heavily textured or smooth like aged Italian plaster—no matter what you desire on your exterior, with Tuscan Glaze you can achieve your highest design ambitions.
