2. HAZARDS IDENTIFICATION

*** EMERGENCY OVERVIEW ***

Form-paste  Color-yellow  Odor-Glycol odor.

COLORTREND colorants may cause eye, skin and respiratory tract irritation. May be harmful if swallowed.

POTENTIAL HEALTH EFFECTS

Eye contact
According to test results on COLORTREND base mixtures, this product is classified as a moderate eye irritant. May cause tearing, reddening and/or swelling.

Skin Contact
COLORTREND colorants may cause irritation. Prolonged or repeated contact may result in defatting and drying of the skin causing skin irritation and dermatitis (rash).

Inhalation
COLORTREND colorants may cause irritation. Overexposure to aerosols or mists containing ethylene glycol may cause lung irritation. See exposure limit (section 8).

Ingestion
May be harmful if swallowed. Ingestion of ethylene glycol may cause abdominal discomfort or pain, nausea, vomiting, dizziness, drowsiness, irritability and central nervous system effects. Swallowing large volumes of ethylene glycol causes severe kidney damage and cardiopulmonary effects (metabolic acidosis) which may be fatal. The human oral lethal dose is approximately 1.6 g/kg. Ingestion of excessive amounts of diethylene glycol causes abdominal discomfort or pain, nausea, vomiting, dizziness, central nervous system effects, kidney damage and cardiopulmonary effects (metabolic acidosis) which may be fatal (estimated human oral lethal dose, 1.0 to 1.2 g/kg) and may cause liver effects. Ingestion of ethylene glycol can cause neurological impairment. Repeated ingestion of ethylene glycol can cause bone marrow, liver, and sperm effects.

**Chronic Health Hazard**

Ethylene glycol may aggravate an existing kidney disease. Repeated skin contact with ethylene glycol may, in a very small proportion of cases, cause sensitization with the development of allergic contact dermatitis. The incidence is significantly less than 1% with the undiluted material. Repeated inhalation of ethylene glycol mist may produce signs of central nervous system involvement, particularly dizziness and drowsiness. Short term exposures to talc may cause lung irritation. Long term excessive exposure to talc dust may cause talcosis, a pulmonary fibrosis which in turn may lead to severe and permanent damage to the lungs. NTP Toxicology and Carcinogenesis Studies of Talc revealed that there is some evidence of carcinogenic activity in male rats and clear evidence of carcinogenic activity in female rats. There was no evidence of carcinogenic activity in male or female mice. Because this product is a free-flowing liquid or paste, dust inhalation is not an expected route of exposure.

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

**Other information**

This material is classified as hazardous under OSHA regulations.
4. FIRST AID MEASURES

**Inhalation**
If inhaled, remove to fresh air. If breathing is difficult, give oxygen. If unconscious, evaluate the need for artificial respiration. Get immediate medical attention.

**Skin contact**
Flush skin with plenty of water. Remove contaminated clothing. Obtain medical attention if irritation develops or persists.

**Eye contact**
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes or until all material has been removed. Obtain medical attention without delay, preferably from an ophthalmologist.

**Ingestion**
Do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get medical attention.
If the heart has stopped or breathing has stopped, trained personnel should begin cardiopulmonary resuscitation or artificial respiration immediately.
Never administer anything by mouth to an individual who rapidly losing consciousness, unconscious or convulsing.

5. FIRE-FIGHTING MEASURES

**Flash point**
not determined
Method: No information available.

**Lower explosion limit**
not determined

**Upper explosion limit**
not determined

**Autoignition temperature**
not determined

**Suitable extinguishing media**
In case of fire, use water (flood with water), dry chemical, CO2 or "alcohol" foam.

**Specific hazards during fire fighting**
Contains material that can burn in fire if contained water is evaporated by heat or fire.

**Further information**
As in any fire, wear self-contained positive-pressure breathing apparatus, (MSHA/NIOSH approved or equivalent) and full protective gear. Containers can build up pressure if exposed to heat (fire). Cool with water spray.

6. ACCIDENTAL RELEASE MEASURES

**Personal precautions**
Wear personal protective equipment; see section 8.
Environmental precautions
Obey relevant local, state, provincial and federal laws and regulations. Do not contaminate any lakes, streams, ponds, groundwater or soil.

Methods for cleaning up
Ventilate area. Absorb spill with inert material and place in a chemical waste container.

7. HANDLING AND STORAGE

Handling

Safe handling advice
Avoid contact with eyes, skin and clothing. Use with adequate ventilation. Avoid breathing vapor or mist. Follow all MSDS/label precautions even after container is emptied because it may retain product residues. Wash thoroughly after handling.

Storage

Requirements for storage areas and containers
Keep in a dry, cool place.
Keep container closed when not in use.
Residual vapors might explode on ignition; do not apply heat, cut, drill, grind or weld on or near this container.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Component occupational exposure guidelines

- ethanediol; ethylene glycol
  CAS-No. 107-21-1
  Control parameters 100 mg/m³
  Aerosol.
  40 ppm
  100 mg/m³
  Vapor.
  Ceiling Limit Value: (ACGIH)
  Ceiling Limit Value: (US CA OEL)

- Talc, Magnesium silicate hydrate
  CAS-No. 14807-96-6
  2 mg/m³
  Respirable fraction.
  The value is for particulate matter containing no asbestos and <1% crystalline silica.
  2 mg/m³
  Time Weighted Average (TWA): (ACGIH)
  Permissible Exposure Limit (PEL): (US CA OEL)
  Respirable dust.
  20 millions of particles per cubic foot of air
  2.4 millions of particles per cubic foot of air
  Time Weighted Average (TWA): (Z3)
Respirable.
The exposure limit is calculated from the equation, $250/(\%\text{SiO}_2+5)$, using a value of 100% SiO$_2$. Lower percentages of SiO$_2$ will yield higher exposure limits.

0.1 mg/m$^3$ Time Weighted Average (TWA);(Z3)
Respirable.
The exposure limit is calculated from the equation, $10/(\%\text{SiO}_2+2)$, using a value of 100% SiO$_2$. Lower percentages of SiO$_2$ will yield higher exposure limits.

0.3 mg/m$^3$ Time Weighted Average (TWA);(Z3)
Total dust.
The exposure limit is calculated from the equation, $30/(\%\text{SiO}_2+2)$, using a value of 100% SiO$_2$. Lower values of % SiO$_2$ will give higher exposure limits.

Other information
The exposure value for ethylene glycol is given as a aerosol.
The AIHA WEEL for diethylene glycol is 50 PPM for total vapor and aerosol and 10 mg/m$^3$ for aerosol alone (eight hour time-weighted averages).
The OSHA TWA and ACGIH TWA exposure values for talc are for asbestos free talc expressed as millions of particles per cubic foot (mppcf).

Engineering measures
Use only in well-ventilated areas.

Personal protective equipment

Respiratory protection
A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use. NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators.

Hand protection
Use impermeable gloves.

Eye protection
Chemical resistant goggles must be worn.

Skin and body protection
A safety shower and eye wash fountain should be readily available. To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132) be conducted before using this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Form       paste
Color      yellow
Odor       Glycol odor.

Safety data
pH      8.0 - 9.5
10. STABILITY AND REACTIVITY

- **Conditions to avoid**: Not applicable.
- **Materials to avoid**: strong acids, oxidizing substances
- **Further information**: Stable under normal conditions.

data sheet of the supplier

Component Repeated dose toxicity
ethanediol; ethylene glycol 107-21-1
Chronic ingestion of an ingredient in this product has been shown to cause adverse effects on the peripheral nervous system of laboratory animals.

Component carcinogenicity assessment
Talc, Magnesium silicate hydrate 14807-96-6
Inhalation Rat(male)
Testing period: 791 d
LOAEL: 0.006 mg/l
target organ/effect: Lungs

Component teratogenicity assessment
ethanediol; ethylene glycol 107-21-1
Ethylene glycol has been shown to produce dose-related teratogenic effects in rats and mice when given by gavage or in drinking water at high concentrations or doses. However, there is currently no available information to suggest that ethylene glycol has caused birth defects in humans.

Component General Toxicity Information
ethanediol; ethylene glycol 107-21-1
Ethylene glycol may aggravate an existing kidney disease. Repeated skin contact with ethylene glycol may, in a very small proportion of cases, cause sensitization with the development of allergic contact dermatitis. The
incidence is significantly less than 1% with the undiluted material. Repeated inhalation of ethylene glycol mist may produce signs of central nervous system involvement, particularly dizziness and drowsiness.

Diethylene glycol  
111-46-6  
According to long-term animal inhalation studies, very high concentrations of diethylene glycol vapors caused central nervous system effects in mice and rats. However, an extensive review of the literature shows that no such effects have been documented in humans (Patty's Industrial Hygiene and Toxicology, 1982, Third Revised Ed., Vol 2c, p 3838).

In a continuous breeding study of mice, continued ingestion of large amounts of diethylene glycol (6 g/kg/day) caused an adverse effect on fertility and some embryotoxic and fetotoxic effects concurrent with some maternal toxicity. The relevance of these very high doses to humans is uncertain.

Dodecylphenoxypoly(ethyleneoxy)ethylene  
9014-92-0  
An ingredient in this product has been shown to cause developmental toxicity in laboratory animals in the presence of maternal toxicity.

12. ECOLOGICAL INFORMATION

General Ecological Information  No ecotoxicological studies are available.

13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL

Advice on disposal  Waste must be disposed of in accordance with federal, state, provincial and local regulations. CONTAINER DISPOSAL: Empty containers by removing the top and inverting to allow all free-flowing product to drain. To meet regulatory criteria, the container is considered empty when less than 3% remains in the container. Additional special handling is not typically required and the empty container can be discarded with other non-hazardous trash. Note: Local disposal regulations may be more stringent and require additional restrictions or precautions. Customers should check with their local disposal company, municipal or state authority. Recycle of plastic or metal containers may require clean rather than empty containers. In this case the containers can be rinsed with water until the containers are considered generally product free.

14. TRANSPORT INFORMATION

D.O.T. Road/Rail

Class 9
UN-No 3082
15. REGULATORY INFORMATION

US Federal Regulations

OSHA
If listed below, chemical specific standards apply to the product or components:

- None listed

Clean Air Act Section (112)
If listed below, components present at or above the de minimus level are hazardous air pollutants:

- ethanediol; ethylene glycol
  CAS-No. 107-21-1

CERCLA Reportable Quantities
If listed below, a reportable quantity (RQ) applies to the product based on the percent of the named component:

- ethanediol; ethylene glycol
  CAS-No. 107-21-1
  Reportable Quantity 52083 lbs

SARA Title III Section 311/312 Hazard Categories
The product meets the criteria only for the listed hazard classes:

- Acute Health Hazard
- Chronic Health Hazard

SARA Title III Section 313 Reportable Substances
If listed below, components are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

- ethanediol; ethylene glycol
  CAS-No. 107-21-1
Toxic Substances Control Act (TSCA)
If listed below, non-proprietary substances are subject to export notification under Section 12 (b) of TSCA:

- None listed

State Regulations

California Proposition 65
A warning under the California Drinking Water Act is required only if listed below:

- None listed

International Chemical Inventory Status
Unless otherwise noted, this product is in compliance with the inventory listing of the countries shown below. For information on listing for countries not shown, contact the Product Regulatory Services Department.

- Europe (EINECS/ELINCS) Not listed/Not registered
- USA (TSCA) Listed/registered
- Canada (DSL) Listed/registered
- Australia (AICS) Not listed/Not registered
- Japan (MITI) Not listed/Not registered
- Korea (TCCL) Not listed/Not registered
- Philippines (PICCS) Not listed/Not registered
- China Not listed/Not registered
- New Zealand Not listed/Not registered

16. OTHER INFORMATION

HMIS Ratings

Health : 2*
Flammability : 1
Physical Hazard : 0

Further information
Changes since the last version are highlighted in the margin. This version replaces all previous versions.
The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
