FOR IMMEDIATE RELEASE

**Dryvit Introduces Outsulation® HDCI™ System With a
First-of-Its-Kind Warranty**

*Outsulation High Durability Continuous Insulation (HDCI)
includes a 20-year puncture resistance warranty*

WEST WARWICK, R.I. (May 8, 2015) — High Durability Continuous Insulation (HDCI™) is the newest addition to the Outsulation® line of [energy efficient building envelope solutions](#) from Dryvit Systems, Inc.

Backed by a unique 20-year performance warranty against punctures and including other performance features, HDCI stands alone in providing building owners and operators with a peace of mind warranty that the system will perform as specified for years into the future. HDCI combines an integrated air/water-resistive barrier, [continuous insulation \(CI\)](#), a superior reinforced base coat and virtually [unlimited aesthetic options](#). Outsulation by Dryvit provides substantially improved energy efficiency over more traditional exterior building products, enabling projects to achieve the latest in ASHRAE and Energy Code standards.

“The [Outsulation HDCI system](#) is a game changer in the market,” said Bruce Wingate, Vice President of Marketing and Sustainability. “This new, advanced system provides a stronger, more durable cladding and a warranty that provides the most comprehensive coverage in the EIFS industry. Outsulation HDCI provides architects, contractors and building owners a superior EIFS solution and an answer to the need for a more durable wall.”

As with all Outsulation systems, HDCI provides [increased energy efficiency](#), a complete single-sourced cladding system and compliance with IECC code requirements. Outsulation HCI is available now. For more information, please visit dryvit.com/hdci.

About Dryvit Systems, Inc.

Dryvit Systems, Inc. (www.dryvit.com) is the manufacturer of Outsulation® by Dryvit, the premier Exterior Insulation and Finish System (EIFS), in the U.S., as well as Triarch, a line of architectural finishes and coatings for the interior of both commercial and residential projects. Dryvit operates all North American manufacturing facilities to both ISO 9001:2008 and 14001:2004 standards. Dryvit is a member of, and is actively engaged in, many relevant construction-related organizations such as AIA, CSI, AWCI, EIMA, NAHB, USGBC and ABAA. Dryvit works both independently and within those organizations to promote energy efficient construction methods that create jobs, reduce reliance on non-renewable energy sources, and reduce the carbon footprint of our nation's buildings.

Dryvit is headquartered in West Warwick, R.I., and has manufacturing facilities there, as well as in Georgia, Oklahoma, California, Canada and Poland.
