**Outsulation® X™ System**

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit's warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.

©Dryvit Systems, Inc.
Issued: 10/2016
NOTE:
1. DRYVIT RECOMMENDS THAT GROUND FLOOR APPLICATIONS AND ALL FACADES EXPOSED TO ABNORMAL STRESS, HIGH TRAFFIC, OR DELIBERATE IMPACT HAVE THE BASE COAT REINFORCED WITH PANZER® MESH PRIOR TO STANDARD PLUS™ MESH. LOCATION OF HIGH IMPACT ZONES SHOULD BE INDICATED ON CONTRACT DRAWINGS.

2. INSTALL FASTENERS IMMEDIATELY FOLLOWING BOARD PLACEMENT, WHILE ADHESIVE IS STILL WET.

Outsulation® X™ System

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. Use of a functionally equivalent detail does not violate Dryvit's warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
NOTE:
1. ALTERNATE FASTENERS AT EACH STUD.
2. STAGGER VERTICAL JOINTS AT ALL INSIDE AND OUTSIDE CORNERS.
3. INSTALL INSULATION BOARD IN RUNNING BOND PATTERN.
4. TIGHTLY BUTT ALL INSULATION BOARDS.
5. INSTALL THREE FASTENERS PER 2 FT (610 MM) BY 4 FT (1219 MM) INSULATION BOARD IMMEDIATELY FOLLOWING BOARD PLACEMENT WHILE ADHESIVE IS STILL WET.
6. FOR ADDITIONAL AIR/WATER-RESISTIVE BARRIER DETAILS, REFER TO DRYVIT PUBLICATION DS840.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. Use of a functionally equivalent detail does not violate Dryvit's warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
NOTE:
1. DRYVIT AQUAFLASH SHALL EXTEND TO INTERIOR FACE OF OPENING.
2. REFER TO HEAD, SILL AND JAMB DETAILS FOR FLASHING INTEGRATION.
3. DRYVIT FLASHING TAPE SURFACE CONDITIONER™ AND DRYVIT FLASHING TAPE™ MAY BE USED IN LIEU OF DRYVIT AQUAFLASH SYSTEM.
4. INSTALL WINDOW UNIT AND ASSOCIATED FLASHINGS PER MANUFACTURER'S RECOMMENDATIONS, CODE REQUIREMENTS AND PROJECT DOCUMENTS.
5. AQUAFLASH SYSTEM CONSISTS OF AQUAFLASH MESH AND AQUAFLASH LIQUID.
6. FOR ADDITIONAL AIRWATER-RESISTIVE BARRIER DETAILS, REFER TO DRYVIT PUBLICATION DS840.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. **STEP #1**

Apply Dryvit Grid Tape™
(See Notes 1 and 2)

**STEP #2**

Trowel apply Dryvit Backstop NT-Texture
(See Note 2)

**STEP #3**

4" (102 MM) MIN.
Apply Dryvit AquaFlash®
System (See Notes 2, 3 and 5)

**STEP #4**

6" (152 MM) MIN.
(Typ)
Trowel apply Dryvit Backstop NT-Texture
(See Note 2)

**NOTE:**
1. Apply Dryvit Grid Tape on head, jamb, and corners of openings and sheathing joints.
2. Trowel apply Dryvit Backstop NT-Texture over the Dryvit Grid Tape all the way to inside face of opening. All voids must be filled; multiple passes may be required. As an option, Dryvit Grid Tape and Dryvit Backstop NT-Texture may also be applied at the sill prior to Dryvit AquaFlash System or Flashing Tape Application.
3. Dryvit Flashing Tape Surface Conditioner™ and Dryvit Flashing Tape™ may be used in lieu of Dryvit AquaFlash System at sill, including corner splices.
4. Install window unit and associated flashings per manufacturer’s recommendations, code requirements and project documents.
5. Refer to head, sill, and jamb details for flashing integration.
6. For additional air/water-resistant barrier details, refer to Dryvit Publication DS840.

Outsulation® X™ System

Opening Preparation -
Backstop® NT™ Option

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project’s design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit’s warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
**STEP #1**

Refer to OX 0.0.03, and OX 0.0.04 for preparation of opening prior to flashing installation.

**STEP #2**

Refer to OX 0.0.12 & OX 0.0.13 for jamb detail.

**STEP #3**

Apply Dryvit AquaFlash® system splices lapping over lip of sill pan flashing. (See notes 1 and 2)

Apply Dryvit AquaFlash® system splices lapping over lip of sill pan flashing. (See notes 1 and 2)

**Outsulation® X™ System**

**Opening Flashing Integration**

**NOTE:**
1. Refer to OX 0.0.12 through OX 0.0.14 for integration of flashing.

2. Dryvit Flashing Tape Surface Conditioner™ and Dryvit Flashing Tape™ may be used in lieu of Dryvit AquaFlash System.

3. For additional air/water-resistive barrier details, refer to Dryvit Publication DS840.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit’s warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
Inside/Outside Corners

NOTE:
1. DRYVIT RECOMMENDS THAT GROUND FLOOR APPLICATIONS AND ALL FACADES EXPOSED TO ABNORMAL STRESS, HIGH TRAFFIC, OR DELIBERATE IMPACT HAVE THE BASE COAT REINFORCED WITH PANZER® MESH PRIOR TO STANDARD PLUS™ MESH. LOCATION OF HIGH IMPACT ZONES SHOULD BE INDICATED ON CONTRACT DRAWINGS.
2. DOUBLE WRAP OUTSIDE CORNERS WITH REINFORCING MESH OR USE CORNER MESH.
3. DO NOT LAP REINFORCING MESH WITHIN 8" (203 MM) OF A CORNER.
4. INSULATION BOARD EDGES SHALL BE OFFSET AT INSIDE AND OUTSIDE CORNERS.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit's warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
NOTE:
1. DRYVIT RECOMMENDS THAT GROUND FLOOR APPLICATIONS AND ALL FACADES EXPOSED TO ABNORMAL STRESS, HIGH TRAFFIC, OR DELIBERATE IMPACT HAVE THE BASE COAT REINFORCED WITH PANZER® MESH PRIOR TO STANDARD PLUS™ MESH. LOCATION OF HIGH IMPACT ZONES SHOULD BE INDICATED ON CONTRACT DRAWINGS.
2. INSULATION BOARD EDGES SHALL BE OFFSET.

Outside Corner - High Impact

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project’s design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit’s warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
Outsulation® X™ System

Termination At Grade

NOTE:
1. DRYVIT RECOMMENDS THAT GROUND FLOOR APPLICATIONS AND ALL FACADES EXPOSED TO ABNORMAL STRESS, HIGH TRAFFIC, OR DELIBERATE IMPACT HAVE THE BASE COAT REINFORCED WITH PANZER® MESH PRIOR TO STANDARD PLUS™ MESH. LOCATION OF HIGH IMPACT ZONES SHOULD BE INDICATED ON CONTRACT DRAWINGS.

2. EXPANSION JOINT IS REQUIRED ALONG TOP OF FOUNDATION IF 2'-0" (610 MM) DIMENSION IS EXCEEDED.

3. ENSURE BOTTOM EDGE OF DRAINAGE STRIP IS LEFT FREE TO DRAIN.

4. DRYVIT FLASHING TAPE SURFACE CONDITIONER™ AND DRYVIT FLASHING TAPE™ MAY BE USED IN LIEU OF DRYVIT AQUAFLASH SYSTEM.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project’s design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit’s warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.
Outsulation® X™ System

Termination At Concrete Curb

NOTE:
1. DRYVIT RECOMMENDS THAT GROUND FLOOR APPLICATIONS AND ALL FACADES EXPOSED TO ABNORMAL STRESS, HIGH TRAFFIC, OR DELIBERATE IMPACT HAVE THE BASE COAT REINFORCED WITH PANZER® MESH PRIOR TO STANDARD PLUS™ MESH. LOCATION OF HIGH IMPACT ZONES SHOULD BE INDICATED ON CONTRACT DRAWINGS.

2. ENSURE BOTTOM EDGE OF DRAINAGE STRIP IS LEFT FREE TO DRAIN.

3. DRYVIT FLASHING TAPE SURFACE CONDITIONER™ AND DRYVIT FLASHING TAPE™ MAY BE USED IN LIEU OF DRYVIT AQUAFLASH SYSTEM.

4. TO PREVENT DEBRIS ACCUMULATION IT IS RECOMMENDED TO TERMINATE SYSTEM 2" (51 MM) ABOVE SIDEWALK.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project’s design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit’s warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.

transition at soffit/fascia intersection

NOTE:

1. DRYVIT recommends that ground floor applications and all facades exposed to abnormal stress, high traffic, or deliberate impact have the base coat reinforced with PANZER® mesh prior to standard plus™ mesh. Location of high impact zones should be indicated on contract drawings.

2. Ensure bottom edge of drainage strip is left free to drain.

3. DRYVIT air/water-resistant barrier is required over vertical substrates. Application over horizontal soffit substrate is optional unless required as part of a continuous air barrier system.

The architecture, engineering, and design of the project using the Dryvit products is the responsibility of the project's design professional. All systems must comply with local building codes and standards. This detail is for general information and guidance only and Dryvit specifically disclaims any liability for the use of this detail and for the architecture, design, engineering, or workmanship of any project. The project design professional determines, in its sole discretion, whether this detail or a functionally equivalent detail is best suited for the project. Use of a functionally equivalent detail does not violate Dryvit's warranty. This detail is subject to change without notice. Contact Dryvit to ensure you have the most recent version.

©Dryvit Systems, Inc. Issued: 10/2016
NOTE:
1. DRYVIT RECOMMENDS THAT GROUND FLOOR APPLICATIONS AND ALL FACADES EXPOSED TO ABNORMAL STRESS, HIGH TRAFFIC, OR DELIBERATE IMPACT HAVE THE BASE COAT REINFORCED WITH PANZER® MESH PRIOR TO STANDARD PLUS® MESH. LOCATION OF HIGH IMPACT ZONES SHOULD BE INDICATED ON CONTRACT DRAWINGS.
2. SOFFITS WITHOUT INSULATION REQUIRE EXPANSION JOINTS EVERY 20 FT (6.1 M).
3. REFER TO DRYVIT PUBLICATION DS173 FOR SPECIFIC REQUIREMENTS FOR SOFFIT AREAS.
4. BOTTOM EDGE OF DRYVIT DRAINAGE STRIP SHALL BE MASKED DURING INSTALLATION TO PREVENT CLOGGING OF DRAINAGE CHANNELS.
