Lightweight, insulated, energy efficient cladding changing the way we think about masonry construction.
NEWBRICK™ IS DESIGNED WITH THE SAME TRADITIONAL BRICK APPEARANCE.

But, now with so much more!

NewBrick™, offers the industry a different way to build more cost and energy efficient traditional looking buildings from the ground up in a faster and simpler way. A game-changing innovation in exterior wall design that can be installed over most common building systems, including concrete and masonry, as well as over any Dryvit Outsulation® CI system.
VERSATILE DESIGN CAPABILITY FOR ANY PROJECT.

NewBrick is available in 16 standard colors and four standard blends so you can create looks that run from traditional to modern. Custom colors and blends are available for your project’s specifications.

Colors shown should be considered approximate of actual NewBrick colors. Some natural variations will be apparent with the product relating to selected color, texture and lighting. A field installed mock-up should be required for every project to confirm design intent of color and texture.
STANDARD BLENDS AND TEXTURES

With NewBrick from Dryvit, the architect can now design cost effective and classic looking buildings. Below are available standard blends, textures, and effects. Custom matches can be provided on request.

**BLENDS**

- **Corinth** (60% Heritage House Flashed, 30% Heritage House, 10% Riverbank)
- **Georgetown** (60% Heritage House, 30% Valley Field, 10% Riverbank)
- **Littleton** (50% Provincial Park, 50% Country Cottage)
- **Rockland** (60% Provincial Park, 30% Country Cottage, 10% Riverbank)

**TEXTURES**

- Smooth
- Velour
- Wire Cut
- Coarse Cut

**EFFECTS**

- Iron Spot
- Flashed
- Flashed with Iron Spot

**BRICK SIZES**

NewBrick is available in four popular sizes — Modular, Utility, Economy and Norman. Shown below are the types and dimensions for Modular. For dimensions on other NewBrick sizes, please refer to Dryvit Publication DS873, NewBrick Installation Details.

Images shown are modular dimensions
NEWBRICK™ IS A LIGHTWEIGHT INSULATED BRICK PRODUCT. It retains clay brick’s classic size and appearance, with so much more.

LIGHTWEIGHT!
- Only 2.45 lbs./sq. ft. before mortar, resulting in higher daily productivity
- Eliminates ties, pans, shelf angles and significantly reduces load bearing footings
- Safer to work with – especially on multi-story construction projects
- Easy to cut and very little dust
- Compresses the exterior construction schedules
- More bricks per truck lowers transportation costs
- Meets the State of California energy efficiency requirements as defined in Title 24, part 6 when installed over any Outsulation CI system

ENERGY EFFICIENT!
- Thermal insulation built right into NewBrick, helps to reduce energy bills!
- When used in combination with Outsulation CI system, it can contribute to LEED credits
- Single manufacturer and installed by a single contractor simplifies jobsite responsibilities and reduces coordination between trades
- Can be installed directly to nearly any solid substrate or any Dryvit Outsulation CI system
- Easy to repair if damaged
- Simple, yet versatile, allowing for decorative patterns and bonds

TESTED!
- Meets NFPA 285
- Contributes to the insulation requirements as published in the IECC and ASHRAE 90.1 when installed over any Outsulation CI system
- NewBrick’s horizontal alignment guide makes installation process easier and faster
WEIGHT AND SIMPLICITY MATTER

For the project: lower weight and increased simplicity equals lower total cost. NewBrick eliminates the need for pans, ties, shelf angles, thermal bridging solutions, and significantly reduces the size of load bearing footings increasing simplicity and reducing project costs. When combined with an integrated Air Weather Barrier (AWB), code approved flashings, continuous insulation and dual drainage planes, NewBrick meets or exceeds the latest building code in every climate zone, all fully tested.

For the installer: lower weight and simplicity equals increased ease of use, which increases productivity. When combined with Outsulation, the wall assembly from sheathing to NewBrick veneer is installed by a single source, which reduces trade coordination, all fully protected by a wall warranty from sheathing to NewBrick.
