

# METALITE® 1100

**MODULITE™**  
Prefabricated Solutions

## High-Performance Vertical Wall Aluminum Composite Material System

### System Overview

Metalite® 1100 is a prefabricated panel system that provides a sleek, flat metal look that will not deform due to thermal expansion. When fully installed with sealant and backer rods in the joints, it works as a complete barrier system.

Additionally, mechanically-fastened perimeter extrusions give it a stronger edge condition for lasting durability — making it especially well suited for use on canopies, architectural fins, beam wraps and column covers. It is lightweight, easy to install, and backed by a market-leading warranty.

### Features & Benefits

- Sleek, flat metal look that will not deform due to thermal expansion
- Mechanically-fastened perimeter extrusions for lasting durability at edges
- Works as a barrier system with sealant and backer rods in joints
- Lightweight and offers quick and easy installation
- Market leading warranty up to 30 years for Metal Finish, 10 years for Delamination, 5 years for Fabrication Workmanship
- Passes NFPA 285 testing and quality assurance quality control
