

# STONE MIST™

A SMOOTH, SPECKLED  
STONE FINISH

 **Dryvit** | BUILD THE TREND

## Interior and Exterior Colored Quartz Aggregate Finish

Stone Mist is a natural finish that accents the environment in subtle tones and enhances any exterior or interior wall. Special aggregates pick up natural sunlight, reflecting the glitter and beauty of only the rarest of stones. Colored quartz aggregate finish is set in a 100% acrylic binder. Stone Mist is offered in ten beautifully designed colors.

Stone Mist is a durable finish for all Dryvit systems. It may also be applied over properly prepared substrates such as masonry, stucco, precast or cast-in-place concrete and other approved substrates. Stone Mist is also ideal for interior applications.
